

1

# Open your Profiles

To stop receiving the iOS developer betas, follow the instructions below to remove the iOS 15 Beta Software Profile. Go to **Settings - General - VPN & Device Management** and tap the ***iOS 15 Beta Software Profile*** that appears.

2

# Remove the iOS 15 Beta Software Profile

Tap **Remove Profile**. If asked, enter your device passcode, then tap **Remove**. Once the profile is deleted, your iOS device will no longer receive iOS developer betas. When the next commercial version of iOS is released, you can install it from Software Update.
